

# Kista Photonics Research Center (KPRC)

An umbrella organisation facilitating and giving a structure to the collaboration between Acreo AB and the Royal Institute of Technology (KTH) In the field of Photonics

***KTH and Acreo together for a larger impact!***

# What is Kista Photonics Research Center?

- Largest and leading R&D centre for Photonics in Sweden (gathering more than 120 researchers)
- One of Europe's largest research centres in optical communication with activities ranging from basic materials research to systems, transmission and networking via a whole range of photonic components based on glass and semiconductors
- A Joint Research Unit (JRU), i.e. a non-legal entity supplementing KTH and Acreo organisations when needed
- An organisation for a more coherent and efficient use of human and equipment resources

# Adding value to joint resources
